

# Turned-Edge Machine Appliqué

Under the Apple Tree

This easy pattern is uniquely designed to teach my turned-edge, layered, machine-appliqué technique using freezer paper templates, liquid starch and nylon invisible thread. Students need to have a sewing machine with 'adjustable blind hem stitch' capability.

## STUDENT SUPPLIES NEEDED:

- Sewing machine with blind-hem stitch capability — Please bring the instruction manual for your machine!
- Extension table (very helpful!)
- Open toe or zigzag foot
- Paper scissors and fabric scissors
- Machine bobbin wound with white or ecru polyester thread (Bottom Line)
- Straight pins for applique
- Finger stiletto (optional)
- Tweezers (optional)
- Thread snips
- Pencil

## STUDENT KIT FEE: \$30

Kit includes pattern, freezer paper, pre-washed fabrics, machine needle and YLI *Wonder Invisible* thread.

Hands-on Class Project  
 Maximum enrollment: 30 students  
 Time: 6 hours

[davidtaylorquilts.com](http://davidtaylorquilts.com)

Older-model domestic machines, basic straight stitch models and portable sewing machines are not well-suited for this class.
