

HANGING SLEEVE INSTRUCTIONS

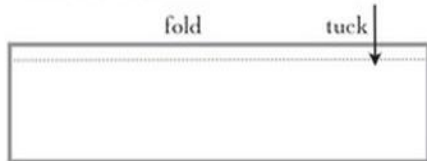

1. Sleeve fabric should be cut 9" wide and the exact width of your quilt.

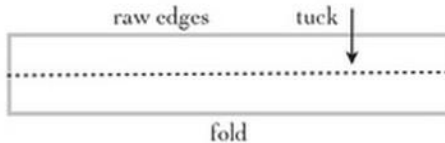

2. Hem the short side ends, turning 1/4" twice.

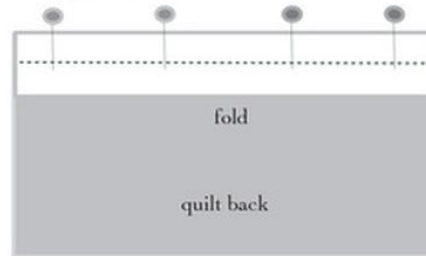

3. Fold under 1 1/2" on one long side of the strip. Press toward the wrong side of the fabric. Base 1/4" from fold, creating a small tuck.

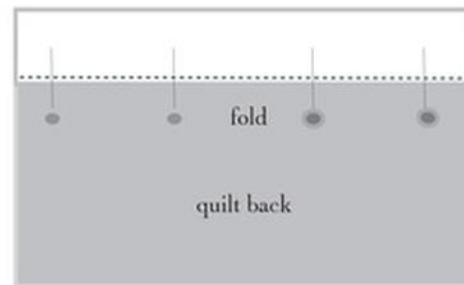

4. Fold in half lengthwise wrong-sides-together, matching raw edges.

5. Pin sleeve to quilt back at top edge. Stitch to quilt using a scant 1/4".

6. Hand stitch sleeve at fold line to back of quilt, using secure stitches. Do not stitch through front of quilt.

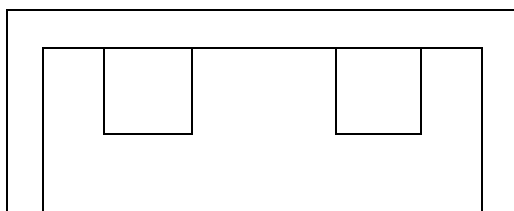

7. Sew on binding, then **remove basting** stitches at tuck to create easement.

OPTIONAL HANGING TABS FOR WALL HANGINGS AND ART QUILTS

- Tab fabric should be the same as used in the quilt or binding.
- Make tabs by any method you choose. Finished tab should measure approximately 1 inch wide and 2 1/2 inches long. At least 2 tabs are needed. The number of tabs you need will be determined by the width of the quilt. Placement of the tabs is decided by the quilter; however the distance between the tabs should not be greater than 10 inches. There are many tab hanging methods available on the Internet
- Tabs can be inserted into the binding or hand stitched to the back.
- Ideally the tabs will lay flat on the back side of the quilt for judging and flip up to reveal approximately 1/2 inch of the tab to be used for hanging.
